

***ATV-320U [4X4] -
Shaft Drive***

ATV-320U 4X4 – New Launch

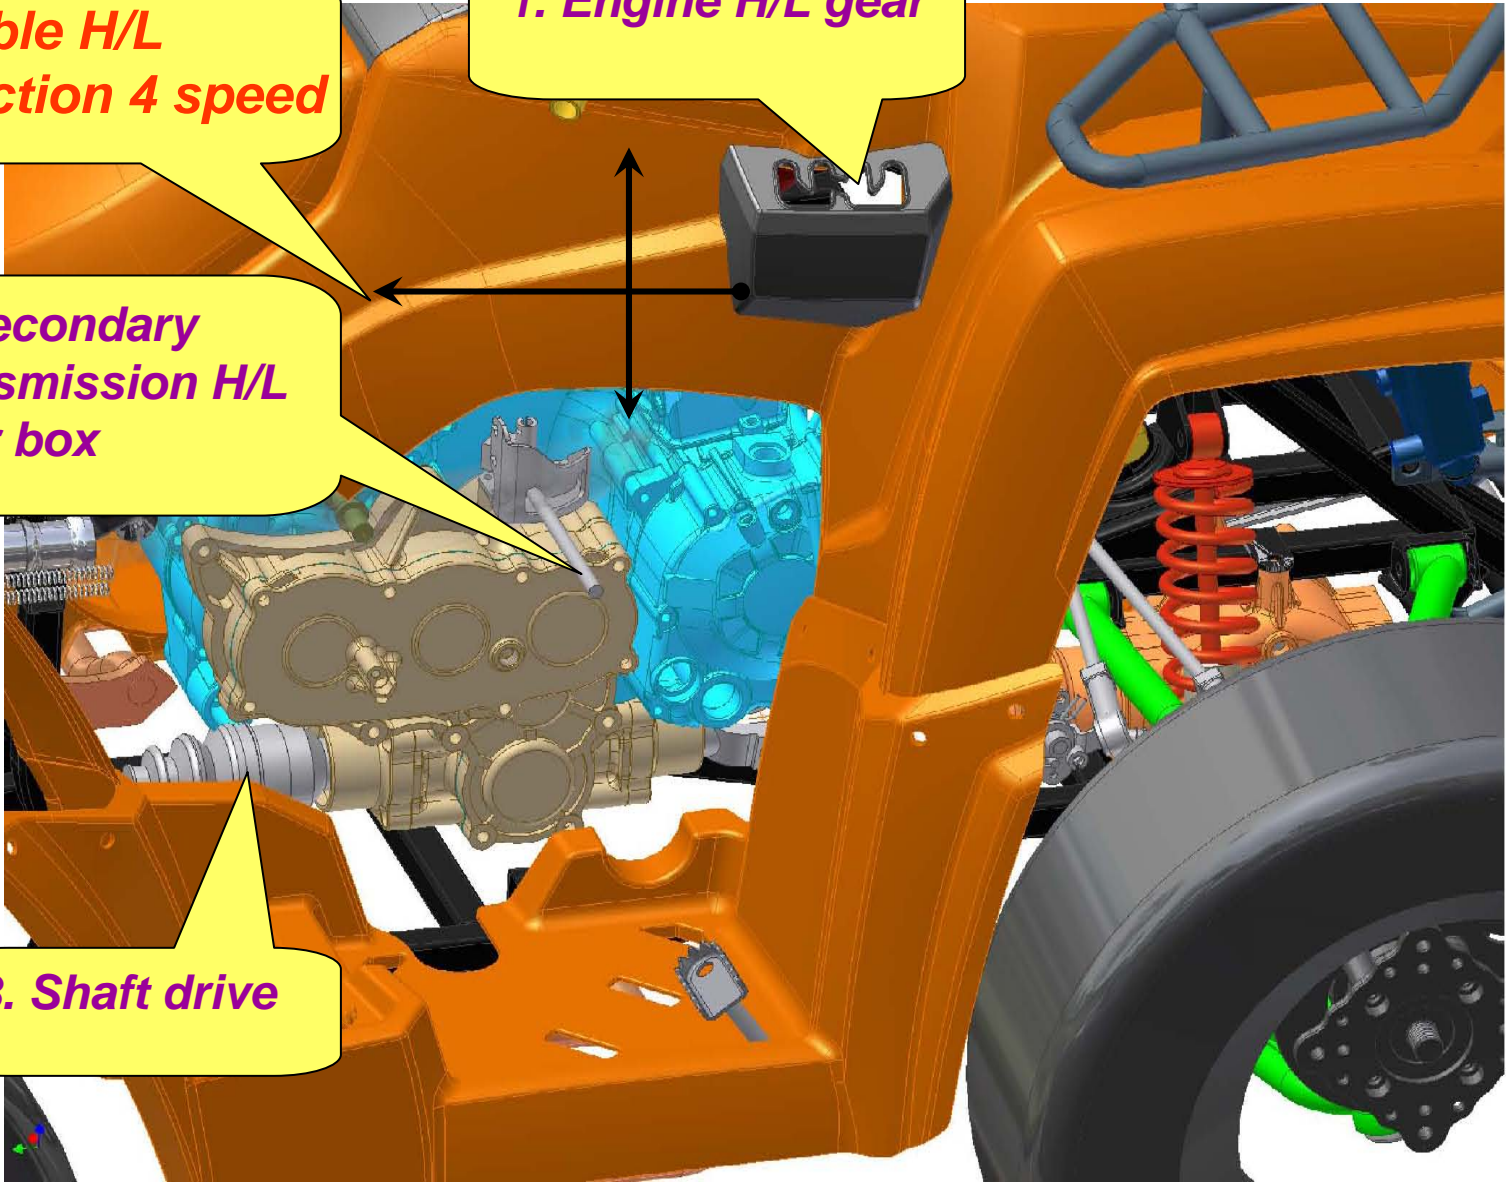

**Double H/L
selection 4 speed**

1. Engine H/L gear

**2. Secondary
transmission H/L
gear box**

3. Shaft drive

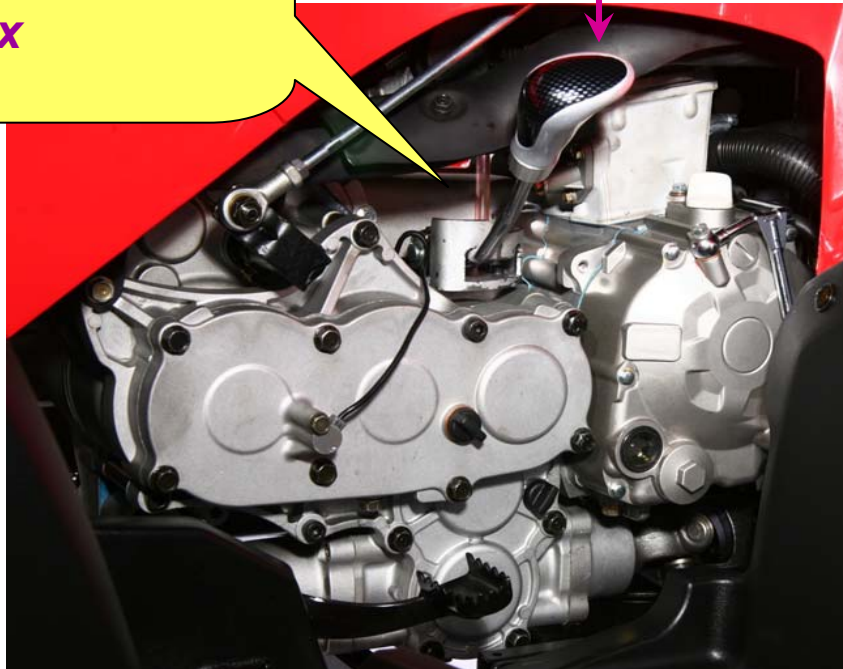

**Double H/L
selection 4 speed**

1. Engine H/L gear

**2. Secondary
transmission H/L
gear box**

- The function for secondary transmission gear is to get high torque application. Our design can **gain about 50% extra torque in order** to carry heavy load and trailer. This also increase the life time of CVT transmission system and increase engine durability.

**Front & Rear A double A-ARM with
4 wheel independent suspension System**

New Parking Brake Lever system

The new position of parking brake lever is the update design to prevent the driving without release parking brake

**Front differential
Lock**

**Rear differential
lock**

Torsion bar

4X4 ATV with WINCH & SNOW PLOUGH
